

How to Achieve Zero Waste with EcoTek® Biodegradable Technology

Single-use gloves designed to solve the world's waste problem and reduce environmental impact.

292.4 MILLION TONS OF TRASH

The amount of trash generated by the US in 2018 with almost half ending up in landfills, according to the EPA.

180 BILLION GLOVES EQUALS 1 MILLION TONS

Based on a 5 gram glove, a small US landfill could hold at least 180 billion gloves.

What happens to nitrile gloves in landfills after 2.5 years?

Regular Nitrile Gloves

Without oxygen, moisture and temperature, biodegradation slows down. Regular gloves will be stuck in landfill for centuries.

100+ Years to Degrade

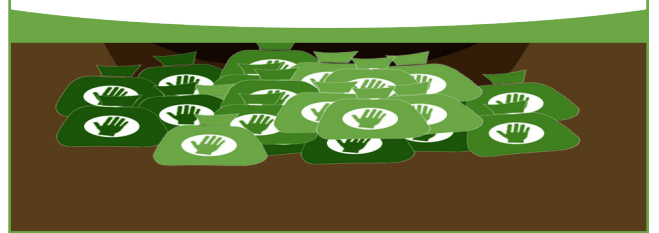

EcoTek Nitrile Gloves

92.6% of the EcoTek gloves break down and the remains become organic, non-toxic materials. Preventing waste pile up and environment pollution.

Waste Reduction

1 million tons of waste is reduced to 74,000 tons!

Zero Waste International Alliance (ZWIA) defined a zero waste company or community as one that achieves at least 90% waste diversion from landfills, incinerators and the environment.

How to Achieve Zero Waste

Waste Prevention, Recycling, Donation, Anaerobic digestion, Composting, Waste Diversion, Waste Reduction, Incineration, Waste to Energy Recovery.
